Data Engineer with 7 years of experience building scalable ETL/ELT pipelines and cloud data platforms with SQL, Python, Databricks, Azure, and Snowflake. Delivered solutions for 9 Accenture clients across insurance, healthcare, retail, and banking while leading offshore teams.

EXPERIENCE

DATA ENGINEER CONSULTANT | 11/2024 - PRESENT

DATA ENGINEER SENIOR ANALYST | 03/2022 - 11/2024

Accenture | New York, NY

- Led end-to-end **data engineering delivery for 9 clients across insurance, healthcare, retail, and banking, designing cloud data solutions in primarily Azure-based ecosystems**.
- Designed and built data pipelines using **Databricks** and **Azure Data Factory** (**ADF)** to deliver analytics-ready datasets in **Snowflake** and **Google BigQuery**.
- Built and optimized **ETL/ELT pipelines and ingestion frameworks,** orchestrating hundreds of concurrent pipelines and hundreds of thousands of daily record changes across multi-source integrations, improving reliability and traceability.
- Strengthened **data governance**, **lineage**, **and quality controls t**hrough pipeline observability, source-to-target mappings (STTM), and automated validation checks.
- Provided **technical leadership** with cross-functional teams to identify client needs, leading offshore teams of **3 to 5 engineers** and serving as primary SME for ETL development, deployment, and platform optimization.
- Directed firmwide learning programs as Director of the **Data & AI 101 Community of Practice**, a network of 1,000+ Accenture employees.

DATABASE ANALYST | 10/2019 - 02/2022

Minerva Knowledge Management, LLC. | Seattle, WA

- Designed structured, traceable database systems that standardized client product development, quality, and sustaining processes.
- Partnered with clients by presenting Minerva's methodologies to senior stakeholders to finalize risk mitigation strategies and application enhancements.
- Built automated business workflows using APIs to integrate application data with third-party platforms such as Salesforce and SharePoint.
- Led QuickBase and PowerApps training sessions for hundreds of attendees.

PROJECTS

STOCK INVESTMENT ANALYSIS TOOL

- Designed and developed a Python stock analysis tool to identify undervalued stocks using real-time valuation metrics (P/E Ratio, PEG, ROIC, Momentum, and more).
- Automated scans of 3,000+ companies, reducing manual research time by over 90%.

IMDB TV PERSONAL DATABASE

- Built a Python web scraper to collect TV shows, episodes, and cast lists from IMDB into PostgreSQL.
- Created Tableau dashboards for episode-rating heatmaps and successful vs. popular actor analysis.

EDUCATION

UNIVERSITY OF WASHINGTON

Seattle, WA

B.S. Informatics | Class of 2019

- Informatics Senior Capstone Project:
  - Product: JavaScript application to teach kids online information privacy
  - Identified the problem, gathered user requirements, and provided a working solution all within six month period
- Dean's List: 2016-2019

SKILLS & TOOLS

Data Engineering: Data Warehousing, Data Migration, ETL Development

Programming: SQL, Python, R, Java

Cloud & Warehousing: Azure, Databricks, Snowflake, Google BigQuery

Orchestration & ETL: Azure Data Factory, Airflow, Informatica

Data Visualization: Power BI, Tableau

CERTIFICATIONS

- Snowflake SnowPro Core Certification
- Microsoft Azure Fundamentals Certification
- Microsoft Azure Data Fundamentals Certification
- QuickBase Expert Builder Certification
